# uvex i-range

sustainable. flexible.  
safe.

## uvex i-guard

additional protection against liquids and large dust particles thanks to the highly flexible frame that adapts to any facial shape without pressure (marking 3 and 4 in accordance with EN 166)

## uvex i-guard+

goggle version of the iguard with the same great features, but EN 166 B impact rated

## uvex i-lite

impressive modern design with flat lens geometry

The uvex i-range is our new flexible 3 in 1 safety eyewear range that allows wearers to select the right product for the workplace hazard or environment.

**x-tended sideshield** for additional side protection

**Flat lens design** for an unrestricted field of vision

With proven **uvex supravision coating technology** and UV400 protection

**protecting planet**

by using recycled material // by using bio-based material

**uvex i-range planet is made of recycled and bio-based materials** to protect the environment

**Ergonomically shaped side arms** for a perfect fit and secure hold without creating pressure points

**Three-stage adjustable side arms** for individual customisation

**Soft and flexible face seal** made from sustainable materials for a universal fit

**uvex i-range utilises recycled materials for its packaging** helping to limit the impact on the environment.

## uvex i-range

- Versatile 3 in 1 safety eyewear range – allows eyewear to be adapted according to workplace hazards
- Large, flat lens delivers unrestricted field of vision
- X-tended sideshield offers additional protection from hazards
- Side arms with multi-incline points allow for a high level of individualisation to ensure a good fit for all facial shapes and head widths
- Ergonomically shaped side arms provide a secure fit without pressure
- Robust polycarbonate lens with uvex's proven supravision coating technology – permanent anti-fog and scratch-resistant lens
- UV400 – 100 % protection against dangerous UVA and UVB radiation up to 400 nm
- Metal-free
- uvex i-guard: soft, flexible face seal adapts to the wearer providing both protection and comfort. It also protects against droplets or splashes of liquids and large dust particles (markings 3 and 4)
- uvex i-guard+: above features together with increased impact protection

## New uvex supravision excellence

Next level performance

Permanent anti-fog coating on the inside  
**exceeds the standard four times over**

### Without anti-fog coating

The lens fogs up on the inside due to the  
wearer's body heat and breath

### Strenuous work, Physical exertion, Intense heat

The newly improved uvex supravision excellence combines powerful anti-fog performance on the inside of the lens, with a durable, scratch resistant coating on the outside. The anti-fog performance is now four times that required by the EN168 standard and twice the performance of its predecessor.

This unique formula ensures lenses stay fog-free for longer, helping to improve safety, product longevity and value for money. uvex coatings are permanent and won't wash off even after repeated cleaning, helping to reduce replacement rates and waste.

## uvex UV400

Included in all uvex safety eyewear

- Even on cloudy days, UV rays can still put a strain on the eyes when working outdoors, where we are regularly exposed to harmful UV radiation.
- Whether you choose clear or tinted lenses, all uvex safety spectacles are equipped with uvex UV400 as standard
- Latest findings show that EN166/170 safety eyewear that provides UV protection up to 380nm is not enough (20% of damaging UV radiation still passes through)
- uvex UV400 provides 100% protection against UVA and UVB radiation up to 400nm for the eyes and surrounding skin helping to minimise long-term damage
- uvex UV400 also reduces damaging blue light content (HEV) by 15% which is harmful to the retina
